

Swarna Andhra@2047

Whole of Government and
Digital Governance

OCTOBER 2024

AP has taken multiple initiatives for efficient governance in the past decade

- **Efficient last-mile setup and grassroots governance:** 15000+ village and ward secretariats¹

- **Top ranker in Achievers category** for Ease of Doing Business: with provision of approvals within 21 working days

- **Adequate women-specific institutions** - 26 DISHA Mahila police stations: With 50% women staff

- **Unified grievance redressal system** launched with helpline for citizens to voice concerns directly with the Chief Minister's Office

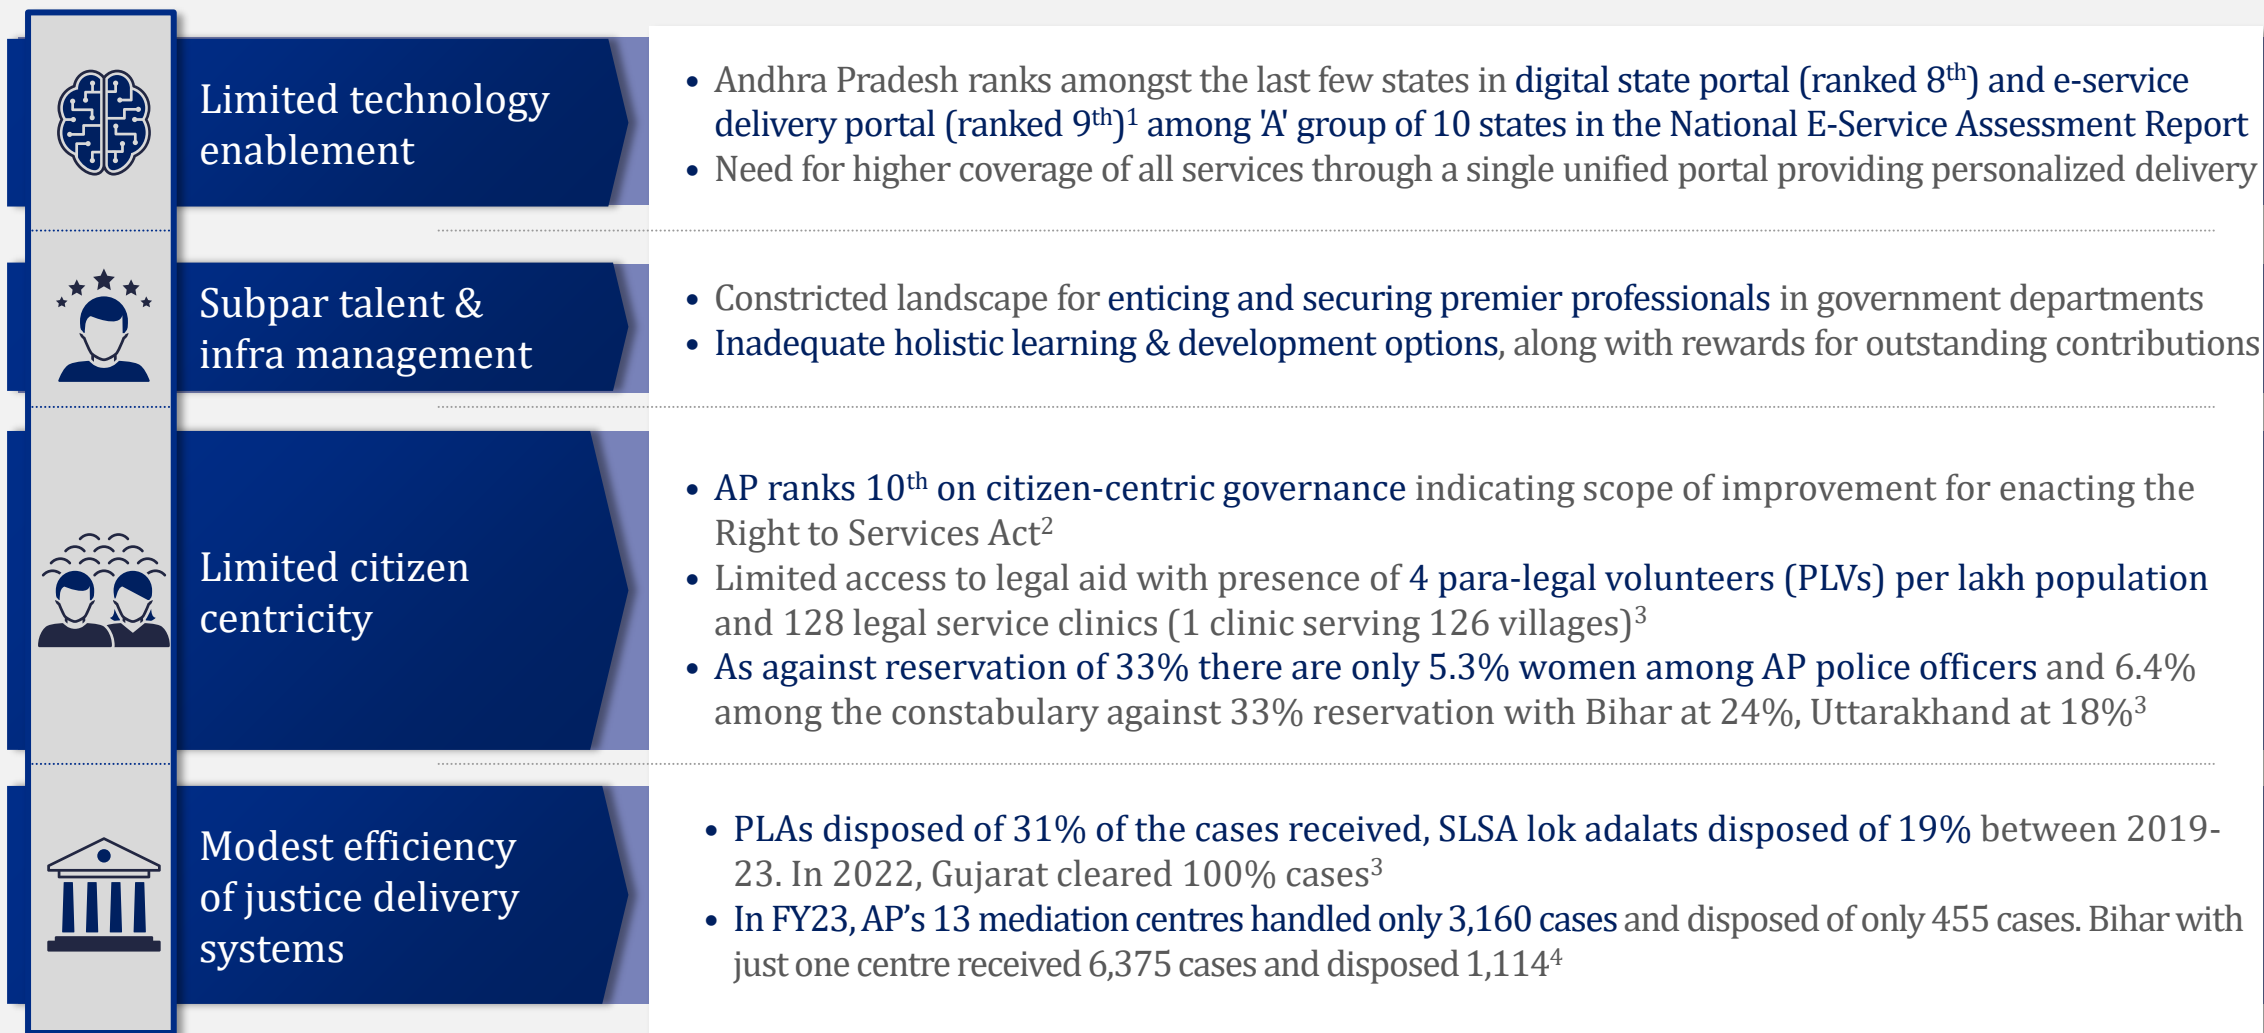

- **Leading state for SHG performance:** 1st in avg. savings amount per SHG and 4th in terms of number of SHGs

- **Innovative digital systems:** Facial Recognition System, Single sign on, and digital portals (e.g., Transfer portal)

However, **four major impediments** to be addressed for a robust and accessible governance going forward

Note: PLA - Permanent Lok Adalat; SLSA - State Legal Services Authority

Source: 1. National E-Service Delivery Assessment 2021 2. Good Governance Index 2021 3. India Justice Report, 2022 4. Lok Sabha Unstarred Question No. 3903 dated 11th August, 2023

Vision@2047: Whole of Government and Digital Governance

"Accessible, robust, outcome-oriented & citizen-centric government and justice system providing efficient, transparent, and tech-enabled governance for all"

Technology-led and Transparent governance ensuring high degree of responsiveness towards citizens and **Speed-of-doing-Business**

Citizen friendly policies to build **Positive Public Engagement**

Efficient, agile and outcome-oriented public workforce capable of adapting to the evolving environment while fostering collaboration and swift decision making

Robust and universally accessible justice delivery system ensuring adequate safety and timely justice delivery for vulnerable groups and uniform access across regions

Eight Macro goals ascertained to achieve 'Whole of Government and Digital Governance' in AP by 2047

	Macro Goals	Current State	Target (2029)	Target (2047)	Benchmarks (Global and Domestic)
Transformative Governance	Ranking in Governance (Good Governance Index - within group A or equivalent) ¹	Overall: 10 th ; 1 st in 1/10 areas (Agriculture & Allied)	Top 6	Overall: Rank 1; 1 st in >3 areas	Kerala and Telangana (1 st in 2 areas)
	Ranking in SDG Performance (SDG India Index or equivalent) ²	4 th	Rank 1	Rank 1	Kerala (1 st)
	Ranking in E-Governance (National E-Service Delivery - within group A or equivalent) ³	9 th	Top 5	Rank 1	Kerala (1 st)
Efficient and Agile justice system	No. of Para-legal volunteers (per 1,00,000 population) ⁴	4	>7	>15	Odisha (12), Uttarakhand (9), Telangana (8)
	No. of Legal Service Clinics ⁵	128	>200	>400	Madhya Pradesh (373), Gujarat (220)
	Share of women in the police forces (%) ⁵	5.4%	>15%	>33%	Bihar (24%), Uttarakhand (18%)
	Share of cases pending for >1 year ⁶	65%	<40%	<10%	Gujarat (57%), Sikkim (44%)
	Average Number of cases disposed per mediation center ⁷	35	>300	>600	Bihar (1,114)

India Justice Report, 2022; 6. National Judicial Data Grid (District and taluka courts) accessed on 8th March 2024; 7. Lok Sabha Unstarred Question No. 3903 dated 11th August, 2023

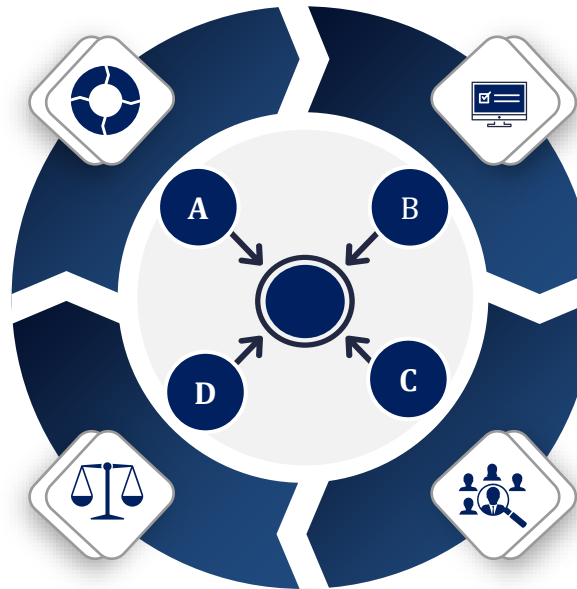

Four thrust areas to achieve Whole of Govt. and Digital Governance

A Whole-of-Government Approach to Decision Making

- A1 Launch AI-enabled one-stop destination for pre-emptive and **personalized cradle-to-grave services delivery** for citizens
- A2 Reimagine government structures for **coherent and integrated decision making**, in-line with evolving world order
- A3 Dedicated task forces and boards for **high-focus areas** and maximum impact
- A4 Promote **collaboration with government and civic-centric startups**

D Efficient Legal and Justice Systems

- D1 Increase **access to legal aid and justice** especially for vulnerable sections
- D2 Enhance efficiency of **police and judicial systems** across regions
- D3 Leverage **Advanced Technologies for Policing reforms** – **Invisible Police, Visible Policing**

B Advanced Technology Infrastructure

- B1 Re-engineer government processes to **improve service quality, cost, and delivery**
- B2 Institute large-scale **Real Time Governance** mechanisms for **enhanced efficiency, transparency and accountability**
- B3 Integrate AI in daily functioning of government departments for **improved workforce efficiency and decision making**

C Accountable and Skilled Talent Building

- C1 Drive **holistic revamp of talent recruitment framework** to ensure a pioneering workforce
- C2 Transform government capabilities via **lifelong upskilling opportunities**
- C3 Implement **outcome-oriented goal setting, performance, and recognition systems**

A

Whole-of-Government Approach to Decision Making

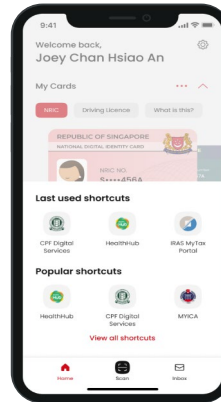

Leading global peers have been establishing **one-stop integrated services platforms** for public service delivery

Global examples for one-stop delivery platforms of all govt. services

Singapore's SingPass Mobile

- 2,700+ digital services, including healthcare, housing & education
- Digital identity
- Biometric login
- Secure authentication
- Receiving government notifications

South Korea's Government24

- Over 900 government services including resident registration, tax services, and employment
- Information on policies
- Apply for online certificates and documents

Few Indian states have also embarked on the journey to set up integrated service platform

Rajasthan provides government services in a citizen-friendly way under one roof. Aims to link all the residents to service delivery systems

Atal Seva Kendra by Haryana acts as front-end delivery point for social sector services¹ in rural areas to build a more inclusive society

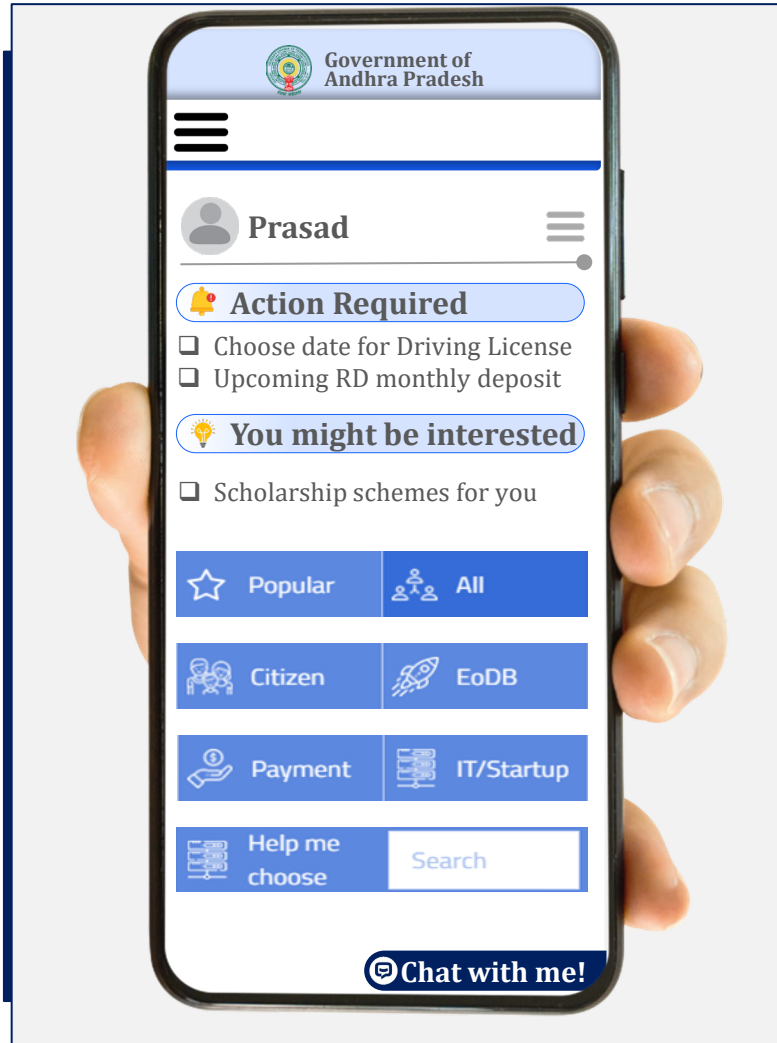

AP has established integrated service delivery gateway, *mee seva*

However, *few improvements needed*:

- Lacks personalization
- Limited automation involving AI

A1 AP to institute AI enabled **personalized lifecycle services for All**

Pre-emptive alerts

Illustrative contextual messages

65-year-old with NCDs

As per blood report dated 1-Sep 2029, last recorded blood glucose levels is 150 mg/dL. Your check-up is due this week, click here to book appointment

18-year-old adult

You are now eligible to apply for a Drivers Learning License. Click to apply

Features

Preemptive, tailored notifications

Secure e-Wallet as one-stop for all payments

Tailored dashboard with progress/status

Multimodal interface and **multilingual** support

Provide feedback and rate services

A1 Set up dedicated task force to establish & drive continuous improvements

Technology upgradation

- Cloud integration and APIs development for integration of services by all departments/ bodies
- Centralized databases and management systems
- Data security and privacy measures to ensure data protection

Training and improvement

- Training for government staff on usage, citizen support & AI
- Invest in R&D to innovate & improve AI applications to explore more use cases
- Create mechanisms for continuous user feedback to identify pain points

Citizen onboarding

- User education material via tutorials, webinars, and help guides
- Awareness campaigns to inform citizens and businesses
- Provide a knowledge base with articles, FAQs, and tutorials on usage of solution

Legal and security

- Ensure formulation of data protection framework in line with existing laws to ensure citizen data security
- Define AI Act to specify requirements for the identification and mitigation of risks associated with AI solutions
- Provide AI Support Toolbox, including Data Sandbox

Global best practices and changing world order **requiring shift towards revamped govt structures**

Rising need to rethink govt. structure

- Rapidly changing global order along with evolving socio-economic priorities
- For better convergence of various ministerial policies on state agendas
- For optimal resource utilization and improved service delivery

Global Example: 1) USA's cabinet with clear focus areas

- **15 federal departments to ensure effective coordination and service delivery**, e.g., Department of State, Department of Agriculture, Department of Education *vs 35+ in AP*
- **Integrated departments with functional similarities**, e.g., – Single ministry of transport
- **Large set (>50) of independent agencies to assist President's & Cabinet's agenda**, e.g., NASA, Small Business Administration etc.

Global Example: 2) UAE has a dedicated ministry for AI

- Basis the magnitude of rapid development of AI and its vast application across industry, UAE created a new ministry to leverage AI's socio-economic potential

A2 AP to adopt a 3-step framework to rethink government structures

Mapping emerging mandates of the state

- Assess current and future priorities of the state basis vision 2047 roadmap
- Rank the priorities in terms of their urgency and impact

Align depts./bodies to achieve the emerging mandate

- Merge mandates/depts. to have integrated decision-making
- Create depts./bodies that are not currently not present but needed
- Phase out depts. basis relevancy, impact

Create new structure of state government

- Dept.
- Semi-autonomous bodies
- Council
- Society

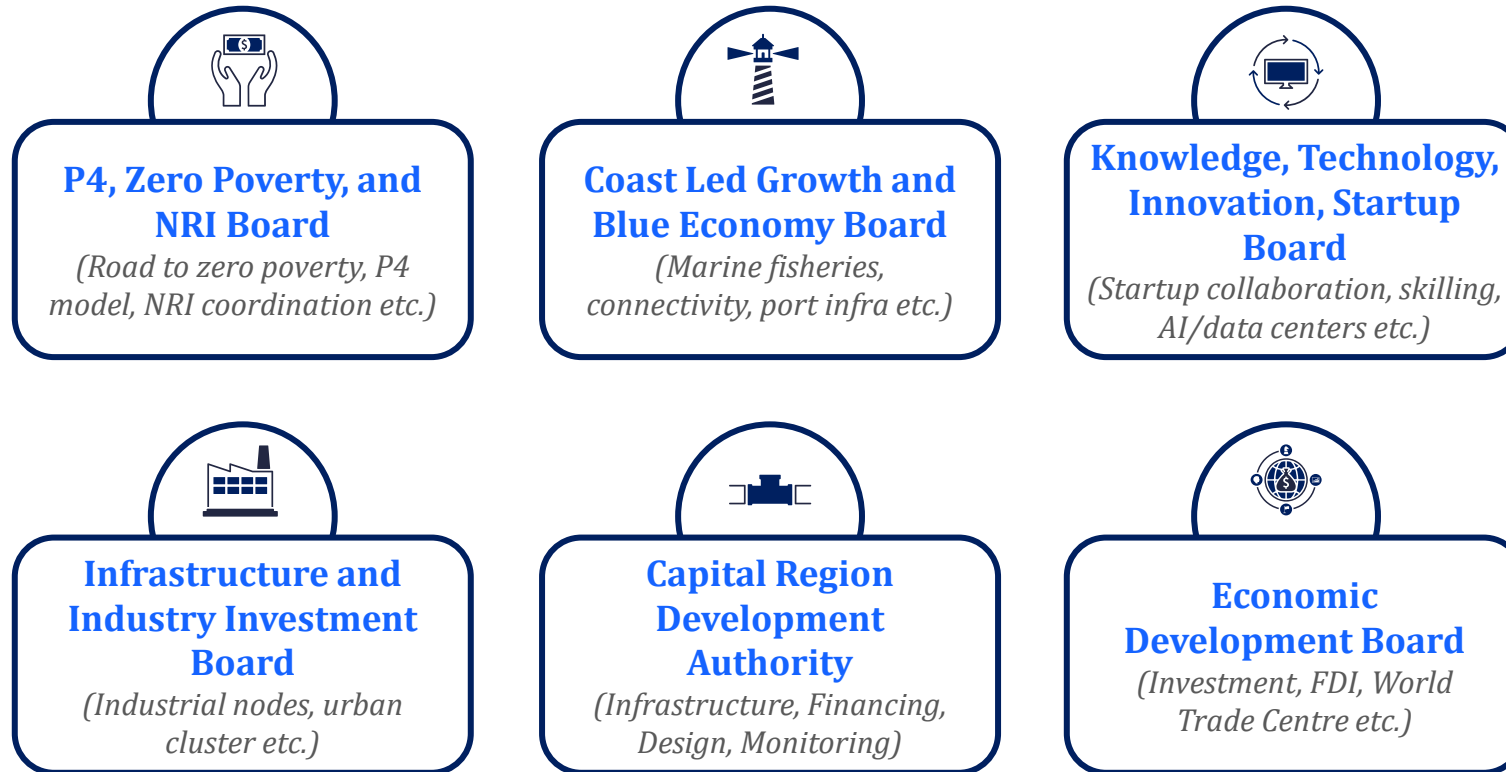

Key Imperatives for AP

Form new government structure by aligning on the emerging mandates basis changing priorities globally

- E.g., form single clear mandate on clean energy to be harnessed between Industries, Energy, and Environment depts.
- E.g., form a new dept. for services as it contributes >40% of GSDP

A3 AP to setup dedicated task forces and boards across high-focus areas for maximum impact

Select high-focus areas

Key functions for a taskforce / board

- **Multidisciplinary coordination, planning, and implementation**
- Identification of **near-term action areas and best-practices** for effective implementation
- Periodic **review and governance cadence**

A3 **Dedicated task forces and boards – Example:** Dedicated cell to drive engagement and wellbeing of Telugu diaspora

Set up a **dedicated Board and Department for Telugu Achievers with different functional verticals** for increased engagement with Non-Resident Telugus

Create **economic opportunities/incentives and networking opportunities to encourage Non-Resident Telugus to invest** in AP and contribute to its growth and innovation

Organize cultural programs, exhibitions, discussions etc. to showcase AP's cultural heritage as well as acknowledge and honour the contributions of the diaspora

Support the youth in academic and professional goals through mentorship programs and workshops; also aid AP Higher Education to start new universities

Case study | Tamil Nadu

Tamil Nadu government has institutionalized the **Non-Residents Tamils Welfare Board** to engage with Tamil diaspora through:

- 1 **Collaboration and knowledge exchange** through cultural festivals, seminars, exchange programs
- 2 Economic empowerment programs to **encourage investment** into TN
- 3 Initiatives to **support educational aspirations of youth** through scholarships and mentorship programs
- 4 Celebrating **Non-Residents Tamil Day** to honour contributions and facilitate dialogue
- 5 **Set up of NRI Cell** under supervision of ADGP

A4

Global peers driving innovation and alleviation of civic problems via increased collaboration with new-age startups / entrepreneurs

Build For Good by Singapore Government

GovTech Catalyst by UK Government

CiviConnectors Program in Egypt by Enpact (NPO)

Overview

- Allows participants to work on one of the 700 identified or other public good problems
- Offers funding up to \$15,000
- It seeks to solve public sector challenges by funding and supporting SMEs
- Offers financial grants up to \$1.6 Mn to develop and implement technological solutions
- Supports tech startups that focus on improving quality of life and enhancing citizen engagement with public services
- Business ideas must be Egypt-based

Execution

- Comprises of two phases - a hackathon followed by an accelerator program for winning teams
- Accelerator provides skills, knowledge, and networking to scale solutions
- For each public sector challenge, a competition is held where suppliers pitch their solutions
- Up to 5 suppliers are funded to work on their ideas for 3 months, and up to 2 of them continue for an additional year
- It starts with idea pitching competition followed by a 6-month incubator for selected teams
- Incubator offers financial support, dedicated mentoring, and workspace access to develop solutions

Impact

2023 edition led to 13 innovative products, with 3 teams receiving \$10,000 for further development

Funded 15 public sector challenges, with a total fund of \$25 Mn

Supported 12 teams and offered direct financial support of 600 Euros/month for 6 months

A4 AP to promote government **collaboration with civic-centric startups**

Setup a **SPV**, with public and private stakeholders, dedicated to solving public good problems via collaborations

Work with startups, academia, and industry to address **specific public good challenges** with innovative solutions

Extend **Financial support** in the early stages of product development, and support commercialization efforts through POCs etc.

Sustained and phased support- **Incubation centres, mentorship, & workspace access** for promising projects

Offer **skills training, knowledge, and networking** opportunities

Structured competitions for solution development and innovation stimulation

Case in point

**Global Alliance For
Mass Entrepreneurship**

- GAME aims to **unlock the potential of Mass Entrepreneurship (ME)** in India through collaborations with government and private stakeholders
- They **raise funds** through not-for-profit organizations and channel them to entrepreneurs
- They also **work with policymakers to create favorable policies** towards a conducive environment for entrepreneurship in the country

B

Advanced Technology Infrastructure

Government Process Re-engineering (GPR) for a Transformative and Future-Ready governance system

Major challenges in govt.-processes today

- **Archaic processes** with inadequate automation / digitization
- **Lack of coherence** and **repetitive low-value-added tasks**
- **Siloed decision-making**, limiting impact of well-intentioned policies

Dedicated GPR wing, for complete overhaul of govt. processes, including:

Process optimization for shorter TAT and outcomes

Enhancing efficiency and standardization of processes

Improving quality of customer service

Streamlining and automation of workflows

Promoting cross-functional collaboration areas

Way forward

Assessment and categorization of services basis volume, frequency and other metrics e.g., Cat. A and B as below

CAT A:
<15 mins and no human intervention

- Aadhar seeding
- ROR certificate printing

CAT B:
>15 mins and reqd. human intervention

- Birth/death certificate
- Land / property registration

Conduct services-wise reengineering and revamp for efficient outcomes

Empanel IT agencies for support in assessment and execution

Real Time Governance mechanisms leveraged globally for unlocking efficiency, transparency and accountability in governance

Multiple countries globally have set up RTG for specific use cases..

Intelligent Traffic Management

- Deploy real-time data collection systems to monitor and manage traffic flow dynamically
- Implement smart parking solutions with sensors to reduce congestion and improve efficiency

South Korea's Songdo City uses over 500,000 sensors to optimize traffic signals and implement smart parking systems, resulting in a 30% reduction in traffic congestion

Smart Water Management

- Implement smart water meters to provide real-time data on water usage for better resource management
- Use IoT sensors to detect leaks and optimize irrigation, reducing water waste

Barcelona uses smart meters and IoT sensors to monitor water usage and manage irrigation, leading to significant water conservation and cost savings

Disaster Monitoring and Response

- Install a network of sensors for continuous monitoring of natural disasters like tsunamis
- Provide real-time data to decision makers for swift emergency response and risk mitigation

New Zealand's National Geohazards Monitoring Centre employs over 500 seismic and strong motion sensors to monitor and respond to natural disasters in real time

B2

AP has a good starting point in RTGS infrastructure; opportunity to further augment for enhanced efficiency and emerge as a leading example

Existing infrastructure in place

- **One Stop Grievance Redressal System**, coordinating with State and District RTGS centers
- **Supporting departments with real-time Technology** for transparent and effective governance (e.g., analytics, dashboards, etc.)
- **Leveraging advanced tech** such as AI/ML, Computer Vision (CCTV cameras), Drones, etc.

Next steps to strengthen RTG systems

- **AI/tech enabled tools for internal use** (e.g., voice and text assistants, projections and insight generation) in all departments
- **Strengthen Digital Public Infrastructure** across sectors
- One stop **dashboard for real time tracking and analysis** of metrics across sectors / topics
- Ensure **high availability** (reducing downtime) and **robust cybersecurity measures**

Conference room

Control room

Strategy room

District RTG Centers

B2 Create a **one-stop RTG Dashboard** for real time tracking of metrics across sectors

One stop digital platform for publishing and analysis data in-line with Swarna Andhra@2047 vision

Finalized KPIs and metadata sheet for each department to be **integrated in RTGS dashboard through APIs**

KPIs to be formulated only on **data that currently exists or is being collected digitally** by departments

Create **sandbox for bulk data sharing with innovators**, adhering to Open Data Policy, Privacy First Approach etc.

Multiple views at different levels for effective governance

1

Collector Level

2

District Officer Level

(Respective owner Department Heads for the data)

3

Mandal Level

(Mandal Parishad Development Officer)

4

Assembly Constituency Level for MLAs

(aggregation of MANDALs data in each Assembly Constituency)

5

Parliamentary Constituency Level for MPs

(Aggregation of Assembly Constituency data in each Parliamentary Constituency)

6

State Level for CM & Council of Ministers

7

Department Level

(Aggregation of data of District Officers concerned)

8

Citizen view

(Real time tracking and updation of data)

Global economies increasingly **leveraging AI in daily governance**

Example - Singapore: Reducing the burden of document preparation work for civil servants

Singapore introducing a system for efficient document preparation using GenAI for ~90,000 civil servants

Dept/Org	Government of Singapore
Outline of Implementation	Incorporating ChatGPT into Microsoft Word to streamline a wide range of natural language tasks, including researching policy-related cases, summarizing news, drafting policy proposals, preparing responses to citizen questions, and more.
Expected Outcomes	Improved business efficiency
Risks/Support	Existing security practices/protocols are under Microsoft. The public officials who use the tools will also be responsible for policy decisions, & for refining & coordinating the content of the documents responsibly.

While deploying ChatGPT, the Ministry of Electronics & Communication Technology assured that, confidential and sensitive information will continue to be handled only by public officials.

Global economies increasingly **leveraging AI in daily governance**

Example – UAE: AI enabling learning outcomes & transformation of the education sector

UAE Ministry of Education is leveraging AI such as AI tutors to supplement existing efforts and improve learning amongst students

Dept/Org	Ministry of Education
Outline of Implementation	- Leveraging AI through chatbot tutors to improve engagement amongst students - AI chatbot tutors will help learning efforts as a part of the existing online education tools that are being used to supplement classroom learning.
Expected Outcomes	- Improved engagement from students - Better learning outcomes - Easy access to learning material/content
Risks/Support	The AI tutors will not supplant the efforts by teachers but will supplement existing coursework & teaching efforts.

AI chatbot tutors deliver personalised & adaptive learning to students, while also providing easy access to learning content & material.

Global economies increasingly leveraging AI in daily governance

Example – Qatar: Enabling digital innovation and transformation using Generative AI

Qatar government partnered with Microsoft to enable access to generative AI models to help in government digital transformation efforts

Dept/Org	Ministry of Communications and Information Technology
Outline of Implemen-tation	• Leveraging existing Microsoft partnership to access Gen AI models • Adopting Gen AI capabilities through Azure in digital government services, including the e-Government Portal “Hukoomi” • Find innovative solutions to the challenges faced by government agencies
Expected Outcomes	• Enable digital & cloud transformation • Improve citizen services through better user experience, & delivery at improved levels of efficiency & speed
Risks/Support	Existing security practices/protocols are under Microsoft

Qatar leveraged their existing partnership with Microsoft to gain access to gen AI models to improve citizen services

B3

AP to integrate AI in daily government functioning for improvements in workforce efficiency and decision making

Improve efficiency of government workforce across levels

Capability building for entry, middle, senior level workforce

Encourage use of AI in areas like include automated notes, research, writing, benchmarking, first draft by AI to bring efficiency and cut costs

Initiate domain specific copilots

(e.g. Use of AI by School audit officer to summarise previous data stored in government repository)

Key enablers for AI integration

- 1 **Collaboration with Tech players** for pilots
- 2 **Appointment of chief AI officer** in all departments, with requisite background and experience for use-cases identification
- 3 **AI-specific trainings across levels** such as AI Bootcamp for Field Officers, including basic AI tools such as OCR, ID Check, and MS office
- 4 **At-scale roll out of successful pilots** (in phases) to address efficacy of tools

Accountable and Skilled Talent Building

C1 Drive **holistic revamp of talent recruitment framework** to ensure a pioneering workforce

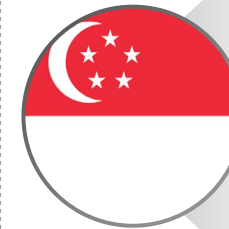

Recruit **laterals** and create adequate career paths, along with hiring **contractual workforce**

- Extend and encourage the **entry of subject matter experts on contractual basis** for increased pace of delivery of projects
- Build mechanisms for **effective resources exchange** with global academia and think tanks

Ensure career flexibility through **lateral exits into industry, with options to join back**

- Introduce **internships and project-based assignments** in partnership with industry
- Re-visit workforce planning at lower levels, secretarial staff

*Example:
Singapore's JobsDB portal
to attract and select
contractual workforce
highly skilled in specific
domains*

*Example:
UK with a fast-track
program providing diverse
rotation opportunities for
individuals with technology
skills attracting skilled
talent for entry-level
positions*

C2 Transform government capabilities with **lifelong learning opportunities**

- Provide Employee upskilling / reskilling integrated with career paths
- Create **Center of Excellence (CoE) on leadership covering new-age topics** like AI, ML, and provide personalized self-paced training that addresses specific responsibilities
- Targeted upskilling initiative basis tiering of govt. staff
- Integrated and comprehensive in-person sessions by specialized faculty and **e-learning platforms**
- **Link career paths to skills** and integrate staggered trainings into the process of career advancement via **industry collaborations**
- **Specialized department trainings** for new and lateral executives
- Develop holistic courses across functional skills, soft skills, tech-enablement, etc.

Govt. Tier / Level	Focus Area	Skills
Strategy	Leadership	Sustainability, AI, adv coms, design thinking
Implementation	Functional	Audit, analytics, HR, project management
Field	Policy details & SOP	Basic communication, drafting/reporting

UK (Government Digital Service (GDS) Academy) has systems to systematically identify & evolve skill profiles that allow dynamic redeployment

UAE is focusing on up-skilling their high-level employees and developing new thinking methods through extensive technology usage

Institute **outcome-oriented goal setting**, performance measurement and recognition system

Enhance employee evaluations by aligning with departmental KPIs

Measure departmental performance and link it to **individual employee level objective and measurable KRAs (Key Result Areas)** and targets

Example:

Singapore assesses government employees based on Key Performance Indicators (KPIs) that are directly linked to their job responsibilities and organizational objectives

Enhance feedback mechanism to improve performance measurement

- **Adopt 360-degree feedback** to streamline personnel processes for better deployment
- **Real-time performance visibility to be provided to employees & AI, data analytics** to be leveraged for departmental feedback on performance levels

Example:

'Service Canada' is a unified feedback form for all departments of the Canadian government that allows citizen feedback on standard metrics

Motivate employees by broader-basing scheme for awarding excellence

- **Enhance performance-based pay** by introducing specialized rewards and recognition for adhering to specific pre-set goals and targets
- **Effectively monitor implementation** to ensure non-performing persons do not continue

Example:

US Postal Service (USPS) and the U.S. General Accounting Office (GAO) have adopted programs that compensate their employees based on performance

D

Efficient Legal and Justice systems

D1 Increase **access to legal aid and justice**, especially for vulnerable groups

Increase access to legal aid, education and awareness

- **Create a trained cadre of educated PLVs** for each village to increase legal awareness and basic dispute resolution.
- **Multiply points of access to legal services** legal information and advice ensuring that legal clinics are spread out evenly across the state - villages and jails.
- Enhance awareness among public about **tele-law and Nyaya Bandhu schemes**
- Ensure increased **engagement with more panel lawyers, PLV and pro-bono advocates.**
- Increase **frequency and awareness of Lok Adalats** ensuring adequate availability of required resources

Ease of access to justice, esp. for women and vulnerable sections

- Revive the **non-functioning Fast Track Special Courts** – 3 such courts in AP
- **Expedite enactment of DISHA** (Special Courts for Specified Offences against Women and Children) Act 2020.
- **Differentiate roles of FTSC judges** and future DISHA judges: FTSCs can focus on POSCO cases and DISHA judges can handle sexual offences against women
- Amplify Mahila Police station details on AP Police website; **increase to 10 women constables and 3 women sub-inspectors (Sis) per station** from one woman per village currently

D2 Improve efficiency of police and judicial systems

Police efficiency and response enhancement

- Holistic establishment of **dedicated cyber cells in all districts** to evenly cover all geographic areas
- Ensure **CCTV coverage within all police stations** by 2029 in line with the Paramvir Singh Saini judgement
- Ensure **quality, regular and timely training** of personnel using tech interventions
- Conduct of sessions on **philosophy, soft skills, and empathy** for staff across hierarchy to instill sensitivity in their dealings with public/potential offenders

Capacity building and efficiency improvement

- Ensure availability of full complement of **non-judicial and administrative staff** to assist judges on the bench
- Review and evaluate setting up of **Commercial courts** for other districts in the state to ensure ease of doing business
- Devise a sustainable plan to **upgrade the existing judicial academy** with full-time faculty and improved infrastructure
- Empanel **Online Dispute Resolution (ODR) platforms** and providers; transition all inter- and intra- govt department disputes to ODR-driven solutions

D3

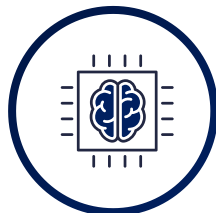

Leverage Advanced Technology in Policing - Invisible Police, Visible Policing

Advanced surveillance for enhanced monitoring and tracking
E.g., Real-time tracking of known and/or potential risk elements in any area through facial recognition, drones etc.

Leveraging **data analytics, predictive models, and AI** to identify trends in large datasets, enabling **efficient allocation of resources and reducing crime rates**

Developing robots/machines for usage in potentially dangerous situations like bomb disposal or patrolling dangerous areas

Adoption of AR/VR tools for realistic training simulations and applications like real-time information on surroundings and criminal records

Employ use of autonomous vehicles to reduce burden of routine tasks for officers to focus more effectively on complex responsibilities

Roadmap for 2029 and 2047

Roadmap 2024–2047: Key interventions and strategic reforms (I/IV)

A Whole-of-Govt. Approach to Decision Making

- Setup and scale to provide one-stop destination for personalized services delivery across the lifecycle of a citizen, with features including -
 - AI-enabled personalized access to services
 - Dedicated taskforce to drive improvements
- Reimagine government structure for coherent and integrated decision making, in-line with evolving world order
 - Ensure convergence of emerging mandates between key stakeholders
 - Align/merge depts./mandates/bodies
- Establish task forces and boards on high-focus areas for maximum impact
 - Set up a dedicated cell for Telugu diaspora
- Set up SPV to promote collaboration with government and civic-centric startups
- Data availability across maximum touchpoints for efficient service delivery

Intervention type	
●	Policy / Legal Reforms
●	People/ Process/ Tech Interventions
●	Institutional / Governance Shifts
●	Financing / Private Sector Collaboration

Roadmap 2024–2047: Key interventions and strategic reforms (II/IV)

B Advanced Technology Infrastructure

- Re-engineer govt. process to improve service quality, cost, access and speed
 - Establish dedicated GPR wing in the Chief Minister's Office
 - Services-wise reengineering and revamp through digital means
- Augment RTGS capabilities to enhance efficiency, transparency and accountability
 - AI/tech enabled tools for internal use (e.g., voice and text assistants, projections and insight generation) in all departments
 - One stop dashboard for real time tracking and analysis of metrics
 - Ensure high availability (reducing downtime) and robust cybersecurity measures
- Integrate AI in daily functioning of Govt. employees to improve efficiency
 - Use of AI Tools for government and learning initiatives like AI bootcamps
- Invest in setting up Digital Nerve Centre – the brain for all tech-led initiatives

Intervention type	
●	Policy / Legal Reforms
●	People/ Process/ Tech Interventions
●	Institutional / Governance Shifts
●	Financing / Private Sector Collaboration

Roadmap 2024–2047: Key interventions and strategic reforms (III/IV)

C Accountable & Skilled Talent Building

- Drive holistic revamp of talent recruitment framework to have a pioneering workforce
 - Promote recruitment of laterals and contractual workforce
 - Introduce internships and project-based assignments
- Transform talent capability by providing **lifelong upskilling** opportunities
 - Provide Employee upskilling / reskilling integrated with career paths
 - Specialized department trainings for new and lateral executives
 - Develop holistic courses across functional skills, soft skills, tech-enablement, etc
- Institute **outcome-oriented goal setting**, performance measurement and recognition systems
 - Enhance employee evaluations by aligning with departmental KPIs
 - Introduce 360-degree feedback mechanism
 - Provide real-time performance visibility leveraging AI and data analytics
 - Devise holistic rewards & recognitions programme to motivate employees
- Establish Center of Excellence (CoE) on leadership in new-age topics like sustainability, AI, critical thinking
- Next-gen ready talent through holistic upskilling

Intervention type

- Policy / Legal Reforms
- People/ Process/ Tech Interventions
- Institutional / Governance Shifts
- Financing / Private Sector Collaboration

Roadmap 2024–2047: Key interventions and strategic reforms (IV/IV)

D Efficient Legal and Justice Systems

- Increase access to legal aid and justice especially for vulnerable groups
 - Create a trained cadre of educated PLVs for each village
 - Enhance awareness among public about tele-law and Nyaya Bandhu schemes
 - Increase the frequency of Lok Adalats ensuring availability of required resources.
 - Revive the non-functioning Fast Track Special Courts – 3 such courts in AP
 - Expedite enactment of DISHA 2020
 - Increase to 10 women constables and 3 women sub-inspectors (Sis) per station
- Improve efficiency of policing and judicial systems
 - Rationalize establishment of dedicated cyber cells in all districts
 - Ensure CCTV coverage within all police stations by 2029
 - Enable quality, regular and timely training of personnel using tech innovations
 - Ensure availability of full complement of non-judicial and admin staff to assist judges.
 - Evaluate set up of more Commercial courts to ensure ease of doing business.
 - Empanel Online Dispute Resolution platforms and providers
- Transition all inter- and intra- govt department disputes to ODR-driven solutions
- Technology in Policing – use of advanced tech like AI, VR, data analytics to strengthen policing systems and reduce crime

Intervention type	
●	Policy / Legal Reforms
●	People/ Process/ Tech Interventions
●	Institutional / Governance Shifts
●	Financing / Private Sector Collaboration

THANK YOU
